

# VALET® PLUS PEDIATRICS

*"We appreciate the ease to get our daughter in and out using the Valet Plus versus the heavy lifting and twisting we went through with other vehicles."*

— Matt R. Ontario

Transport infants and young children in car seats safely and easily with the Valet Plus optional LATCH kit.

What's LATCH? (Lower Anchors and Tethers for Children)  
LATCH is a system that makes child safety seat installation easier without using seat belts.

- Valet Plus LATCH kit is FMVSS 255 compliant when not exceeding weight limits\*
- Forward or rear facing car seats; first or second row
- Valet Plus LATCH kit safely secures the child seat while the Valet Plus rotates in and out of the vehicle.

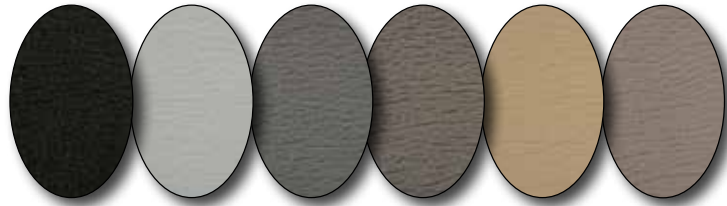

\*The Bruno LATCH kit system is rated up to 80 lb. If the weight of your child and car seat is greater than 80 lb, the vehicle's seat belt must be used. Please refer to your child seat's manual when using the vehicle seat belts.

*Contact Bruno dealer for details*

## VALET® PLUS

### Ultraleather™ Plus

See material swatches for accurate color representation.

### Metro Tech Fabric
